

Azmol Huda Nahid

AI Automation & Full-Stack Engineer | Python, FastAPI, APIs & AI Systems

Dhaka, Bangladesh | +8801757853828 | azmolhudanahid@gmail.com

LinkedIn | GitHub | Portfolio

PROFILE SUMMARY

AI-focused software engineer with hands-on experience building and operating production AI automation systems using Python, FastAPI, Docker, LLMs, REST APIs, webhooks, databases, and third-party integrations. Built and operate Nuigent, a multi-tenant AI business automation platform connecting Facebook and Instagram conversations with business knowledge, product data, order workflows, content automation, notifications, and reporting. Experienced in testing AI workflows, debugging integrations, implementing human-approval and safety gates, and designing reliable data flows across systems. Strong web-development foundation across Laravel, PHP, Node.js, React, JavaScript, MySQL, MongoDB, and WordPress. Nuigent was primarily developed using Claude Code.

TECHNICAL SKILLS

AI & Automation: LLM applications, AI agents, prompt engineering, AI workflow automation, human-in-the-loop AI, AI-assisted development, Claude Code, ChatGPT, Claude, Gemini

Backend & APIs: Python, FastAPI, Laravel, PHP, Node.js, REST APIs, webhooks, API integration, JSON, authentication, Docker

Frontend & Web: React, JavaScript, HTML, CSS, Bootstrap, Material UI, Next.js, WordPress, responsive UI

Databases & Data: MySQL, MongoDB, Firebase, Google Sheets, structured data processing, data synchronization

Tools & Engineering: Git, GitHub, third-party integrations, debugging, automated testing, admin dashboards, CMS-style systems

SELECTED AI SYSTEMS EXPERIENCE

Nuigent — Multi-Tenant AI Business Automation Platform

Python, FastAPI, Docker, LLMs, Meta APIs, Webhooks, Databases | Primarily developed using Claude Code

- Designed and operate a multi-tenant AI business automation platform handling Facebook and Instagram DMs/comments, voice notes, product-photo queries, order capture, content generation, notifications, and reporting.
- Built grounded AI workflows using business knowledge, product/price data, customer history, and inventory information; unknown or sensitive questions are escalated instead of guessed.
- Implemented human-in-the-loop approval, escalation rules, self-evaluation, and workflow safeguards for uncertain customer interactions.
- Integrated APIs, webhooks, Google Sheets data flows, databases, notifications, and external AI services to connect customer conversations with business operations.
- Built multi-tenant data isolation, client roles, onboarding workflows, encrypted credentials, backups, and health monitoring for a reusable automation platform.
- Implemented automated testing and validation across AI workflows, integrations, data flows, and tenant isolation; the current capability ledger reports 997 passing tests, 35 agent tools, and 27 working capabilities.
- Developed interconnected order, inventory, pricing, content-generation, reporting, and notification workflows; debugged production issues involving authentication, webhooks, synchronization, and third-party services.

SELECTED SOFTWARE PROJECTS

Nuigent — Multi-Tenant AI Business Automation Platform

Python, FastAPI, Docker, LLMs, Meta APIs, Webhooks, Databases

- Production AI automation platform for customer conversations, orders, content, notifications, reporting, and multi-business workflows.

[Live Project](#)

Everyday Crackers — Laravel E-commerce Platform

Laravel, PHP, MySQL

- Built a complete e-commerce platform with product catalog, shopping cart, checkout, order management, and admin dashboard; developed business-oriented product and order workflows.

[Live Project](#)

Hospital Management System

Laravel, PHP, MySQL

- Developed a hospital management application covering core administrative and healthcare workflows using Laravel and MySQL.

[GitHub Project](#)

POS (Point of Sale) System

Laravel, PHP, MySQL

- Developed a POS system for retail/business operations covering inventory tracking, billing, and sales reporting.

PROFESSIONAL EXPERIENCE

Radio Active Engineer — Taurus International | 1 September 2024 – 28 February 2025

Remote Intern — Graphic Designer — Zenana and 1972 Conscious | 1 June 2025 – 22 October 2025

EDUCATION

B.Sc. in Computer Science & Engineering (2023) — Daffodil International University | CGPA: 3.28

H.S.C, Science (2018) — Holy Land College, Dinajpur | GPA: 3.42

LANGUAGES

English: Working proficiency | Bangla: Native / Bilingual proficiency
